EDUCATION

University of California, San Diego <i>B.S., Math - Computer Science</i>	Jun. 2028
Santa Monica College <i>GPA: 3.7/4.0 Honors Program Member IEEE Computer Society Member</i>	Jun. 2026

TECHNICAL SKILLS

Languages: C++17, Python (AI/ML), JavaScript (React), Bash
Developer Tools: YOLOv8, Hailo-8L NPU, Linux (Debian/Ubuntu), Edge Computing, PyTorch (Model Training)
Software and Frameworks: React.js, Git/GitHub Actions, Vercel
Web & Design: Figma, Framer, Adobe Creative Suite (Illustrator, Photoshop), CAD

PROFESSIONAL EXPERIENCE

Stocker (Fintech AI Startup)	May 2026 - Present
-------------------------------------	---------------------------

<i>Machine Learning Engineer</i> - Developing data pipelines and RAG infrastructure for an AI-powered financial research platform. - Architected SEC EDGAR ingestion systems with semantic chunking for data preprocessing, streamlining institutional investment analysis workflows.	
Santa Monica College Santa Monica, CA <i>Supplemental Instruction Leader/ Teaching Assistant</i> Directed peer-to-peer instruction for a 120-student Data Structures (C++) course, focusing on complex memory management, pointers, and OOP paradigms. Debugged 50+ student C++ programs weekly using VS Code to resolve memory leaks and segmentation faults. - Integrated CI/CD workflows into the curriculum, teaching GitHub Actions for automated testing.	Sep. 2025 - Dec. 2025

RESEARCH & PROJECTS

TALOS: Open-Source Bicycle Safety System Achieved 26x inference speedup (3 to 80+ FPS) by migrating the vision pipeline to a Hailo-8L NPU, enabling real-time blind-spot monitoring on a Raspberry Pi 5. Increased motorcycle class recall by 41% by fine-tuning YOLOv8 on a custom dataset with class oversampling and published versioned models to Hugging Face. Built a threat-isolation algorithm based on Tau Theory (Time-to-Collision) to filter background noise and calculate time-to-collision, reducing false-positive alerts on stationary vehicles for high-speed transit safety.	
Apollo: Full-Stack Campus Resource Application React.js, Python - Streamlined campus navigation and study-room discovery by architecting a live interactive SVG map in React.js that visualizes real-time room occupancy for 250+ students monthly at apollo.kevindavidson.work. - Engineered a Python ETL pipeline to scrape and sanitize unstructured Oracle APEX schedules, converting 1700+ records into optimized JSON for sub-second client-side rendering through GitHub Actions.	

LEADERSHIP EXPERIENCE

HackSMC Santa Monica, CA <i>Outreach and Sponsorship Lead</i> Directed external communications and strategic outreach for a regional hackathon, leading a 5-person team to secure \$16k in corporate sponsorships, university grants, and prizes by developing a tiered sponsorship system and pitching to companies.	Jan. 2026 - Apr. 2026
Future in Tech at SMC Santa Monica, CA <i>Co-Founder and Vice President</i> Established a technical student community to connect curriculum and industry, scaling membership to 80+ active members through weekly workshops on AI, cloud architectures, and career development.	Aug. 2025 - Jun. 2026
Obscura Design Los Angeles, CA <i>Founder and Product Designer</i> Product Designer for 30+ B2B UI/UX clients, securing recurring design contracts with 5+ core partners.	Oct. 2020 - Present

AWARDS & HONORS

1st Place, SMC STEM Poster Symposium 2026 - Helset Scholar Finalist, Stanford Bay Honors Symposium 2026 - Finalist, SMC Global Citizenship Symposium 2026	2nd Place, CCSC Southwest 2026 - Honorable Mention, IEEE SusTech 2026
